

The manuscript collections of History Nebraska include the records of many Nebraska churches. The following list indicates all the manuscript collections that contain church records, arranged by county and town. While most collections include minutes and vital records (such as information on marriages, baptisms, births and deaths), a few contain only bulletins, short histories or other brief records. Some of the records appear in languages other than English, such as German and Swedish. All except those marked with an asterisk (*) are on microfilm and available through interlibrary loan.
