

FOR WOMEN EMPLOYEES

Your employment in our industry is vital to us and vital to you. Looking at the overall picture we are convinced that you will appreciate our bringing the following requests to your attention and for your cooperation.

1. We are interested in your skin—wash and use the protective cream frequently. Consult us or the Safety Dept. if you are in doubt about which one to use.
2. Report all accidents or illnesses to the First Aid Department immediately.
3. Guard your health by wearing safe work clothes correctly.
4. Let us know if you become pregnant during your employment with us.

An early report of accidents, illness and pregnancy to the First Aid Department will allow us to cooperate with your family doctor, make work hours safe, and guard your health.
